

Jacob Brown - Undergraduate Student

Age: 20

Major: Computer Science, Sophomore

Tech Proficiency: Intermediate

Profile

Jacob is a second-year computer science student who works part-time as a waiter. He frequently uses the student portal on both his computer and smartphone to check his grades, course enrollments, and financial aid status. He relies on an reliable system to apply for scholarships and track his progress toward graduation.

Goals

- Track academic progress with easy access to grades, course history, and academic standing, assignments and other course due dates.
- Apply for scholarships and monitor financial aid status.

Challenges

- System Complexity: Navigating multiple portals for grades, transcripts, and financial aid.
- Limited Time: Juggling school, work, and applications for internships.

Motivation

Jacob's primary focus is to graduate on time and secure internships to prepare for a tech career. He seeks systems that simplify his tasks and reduce the time spent navigating academic processes.

Behavioral Patterns

- Frequently checks grades and course status.
- Needs help understanding how to improve his GPA.
- Uses a mobile device to access academic records on the go

Sarah Lee - Graduate Student

Age: 27

Program: MBA, Second Year

Tech Proficiency: Advanced

Profile

Sarah is a working professional completing her MBA part-time. She manages her coursework alongside her job as a financial analyst. Sarah needs easy access to her course schedule, deadlines, and progress towards graduation. Since time is very important to her, she values systems that provide planning tools to ensure you manage to plan effectively.

Goals

- Keep track of important deadlines for course registration and thesis submission.
- Access information on job placements and alumni networking events.
- Stay updated on tuition payment status and available financial aid.

Challenges

- Time Management: Balances work and studies, leading to tight schedules.
- Complex Academic Planning: Needs to ensure she meets all graduation requirements.

Motivation

Sarah is focused on advancing her career and making connections through her MBA program. She wants tools that make it easy to track her academic requirements and stay on top of deadlines.

Behavioral Patterns

- Checks the academic portal a few times per week to monitor deadlines.
- Prefers email reminders for key dates like payment deadlines and registration.
- Actively participates in networking events organized by the school.

Dr. Lisa Lee - Professor**Age:** 45**Department:** Computer Science**Teaching Experience:** 15 years**Profile**

Dr. Carter is a full-time professor who teaches both undergraduate and graduate courses. She uses the student information system to track her students' progress, manage course enrollments, and enter grades. Dr. Carter values an efficient platform that makes it easy to communicate with students and view their academic history.

Goals

- Easily enter grades and provide feedback for assignments.
- Communicate with students about course updates or academic concerns.
- Track student attendance and participation to support advising efforts.

Challenges

- Time Constraints: Needs to manage multiple student records and assignments efficiently.
- Complicated Systems: Finds some parts of the academic system cumbersome to use.

Motivation

Dr. Carter is focused on providing timely and meaningful feedback to students. She wants to focus more on teaching and advising, with less time spent on admin related tasks.

Behavioral Patterns

- Logs into the system at least once a day to monitor student progress.
- Prefers using mass upload features for grading.

- Prefers using mass emailing features for sending out announcements.

Mark Thompson - Academic Advisor

Age: 38

Department: Business Administration

Advising Experience: 10 years

Profile

Mark is an academic advisor for both undergraduate and graduate students. He assists students in course selection, monitors their academic progress, and advises them on how to meet graduation requirements. Mark often reviews student records to provide personalized guidance.

Goals

- Track student progress and identify students at risk of falling behind.
- Help students plan their courses to graduate on time.
- Provide personalized advising, including transfer credit evaluations.

Challenges

- Student Communication: Finds it challenging to keep track of which students need follow-ups.
- Graduation Planning: Needs better tools to ensure students meet all program requirements on time.

Motivation

Mark is focused on helping students succeed by providing one on one personal guidance. He wants to make sure every student is on track to graduate and be successful.

Behavioral Patterns

- Frequently checks student records before advising sessions.
- Uses both the desktop system and mobile for advising on the go.
